WOODGRAINS & PATTERNS COLLECTION

Formica Corporation, a design leader in decorative surface realism, offers new woodgrains and patterns for 2025 filling out the laminate range with more options for commercial interiors, millwork, and furniture.

THE TRENDS

Honest materials executed in familiar warm hues are key for timeless modern interiors that celebrate understated comfort. Special details in terms of wood layouts, material concrete, and textile visuals support the subtle trend changes.

Straight-grain woods, which have been popular and familiar for the past decade, are now giving way to classic wood layouts with more expressive figuring. This elegant trend celebrates cuts of wood that reveal ‘cathedrals’ resembling the pointed arches and tall, narrow windows of Gothic cathedrals.

As commercial interiors move to more refined spaces, unassuming details make healthcare, hospitality, and business-oriented spaces livable without being too casual. The color palettes focus on biophilic schemes, natural and browned wood stains, colors of beige, greige, green and warm gray – all of which are very subtle.

WHITE OAK

9038-26 Natural White Oak - Timeless yet contemporary, Natural White Oak features the classic cathedral grain pattern that defines white oak's heritage—refreshed with a warm, medium beige stain.

Crafted from dense, flat-cut hardwood, this versatile surface brings architectural sophistication to both modern and traditional interiors. Finished in our signature matte -26 Oiled Wood texture, it delivers a tactile, natural feel that invites connection.

MAPLE SERIES

9039-58 Silver Maple - Refined and radiant, Silver Maple brings quiet luxury to the forefront with its fine-grained, flat-cut maple veneer. Subtle pearlescent highlights drift across a pale, airy layout, catching light with a soft shimmer that adds depth and realism. This woodgrain elevates the timeless appeal of maple with a modern, luminous edge—ideal for serene, light-filled interiors.

MAPLE SERIES

The image features a large, dark wood dining table with a smooth finish. On the table, there is a white coffee cup with a black lid, a pen, and two spiral-bound notebooks. The background shows a modern interior with a dark wall and a window with white curtains. A close-up of the wood grain is shown in the top right corner.

9040-58 Fumed Maple - Rooted in tradition, elevated by innovation—Fumed Maple reinterprets the artisanal fuming process with a modern touch. This refined maple woodgrain features a rich, smoky base brought to life by copper pearl accents that illuminate the grain's natural flow. The result is a surface with quiet drama—layered, dimensional, and perfect for warm, contemporary interiors seeking depth without heaviness.

HICKORY SERIES

9041-NG Natural Refined Hickory - Elegant strength defines Natural Refined Hickory—a hardwood known for its durability, now reimagined with a light, contemporary touch. Its narrow cathedral grain offers quiet movement, while the clean, fresh cut delivers a crisp alternative to traditional maple. Balanced and versatile, this surface brings subtle texture and warmth to refined interiors.

HICKORY SERIES

9042-NG Brun Refined Hickory -

Grounded and graceful, Brun Refined Hickory brings warmth and depth to refined interiors. With its rich brown tone and tight cathedral grain, this durable hardwood offers a sophisticated foundation for millwork, cabinetry, and statement furniture.

The -NG Natural Grain texture enhances hickory's natural intricacy while delivering a contemporary palette rooted in elegance.

TAMARIND

9043-NG Coco Tamarind - Bold yet balanced, Coco Tamarind channels the richness of tropical hardwoods with a contemporary sensibility. Its distinctive interlocked grain moves organically beneath a deep red-brown linear stain, creating visual rhythm and warmth.

Exotic in origin but highly adaptable, this surface brings a curated global character to modern interiors.

RIFTWOOD SERIES

9281-NG Ash Riftwood - Ash

Riftwood captures the quiet strength of classic wood in a refined, reconstituted form. With its even grain, medium pore structure, and low-luster finish, this light neutral surface offers a subtle rhythm and timeless appeal.

Designed for both horizontal and vertical applications, it's a versatile essential—perfect for interiors seeking warmth without distraction.

RIFTWOOD SERIES

9282-NG Natural Riftwood - Natural Riftwood brings a warm, mid-tone beige to the classic rift-cut aesthetic. Its balanced grain and low-sheen finish create a grounded, versatile surface that complements both modern and traditional interiors. With its understated texture and timeless color, this reconstituted wood look offers quiet sophistication for millwork, cabinetry, and vertical applications.

FABRIC SERIES

6128-58 Sisal Fabric - Inspired by natural linen, this warm brown textile look features a subtle cross-weave pattern layered over a neutral base and highlighted with soft white threads. Designed to coordinate seamlessly with 3202 Otter, it brings an organic, textural element to any space.

FABRIC SERIES

6131-58 Palma Fabric - A lively botanical green woven into a linen-inspired texture. This refreshing hue captures the shift toward nature-infused interiors, offering a soft yet vibrant update to the commercial palette.

CLOTH SERIES

6124-58 Raw Cloth - Inspired by traditional textile construction, the Cloth series features a broken twill weave with subtle herringbone detailing and soft linear movement. It offers the familiar comfort of fabric with all the durability and cleanability of laminate. Raw Cloth introduces a true neutral weave look that effortlessly complements 464 Graystone, delivering warmth and versatility to a wide range of interior settings.

CLOTH SERIES

P.14

6125-58 Pampas Cloth - Carrying forward the refined broken twill weave of the Cloth Series, Pampas Cloth introduces a toasted green hue that blends warmth with a touch of earthiness. The subtle herringbone texture adds visual interest while maintaining a clean, textile-inspired aesthetic. This versatile tone pairs beautifully with 8793 Green Slate, making it an ideal choice for grounded, nature-influenced interiors.

SILTSTONE SERIES

9036-58 Limed Siltstone - A refined take on the speckled aesthetic, this design draws from fine sediment textures—gravel, mineral particles, and pebbles—to create a look that bridges the visual space between concrete and terrazzo. Limed Siltstone offers a warm, light gray base subtly scattered with neutral pebbles, making it a versatile surface that pairs seamlessly with 464 Graystone.

SILTSTONE SERIES

9037-58 Flint Siltstone - Rich in texture and grounded in natural appeal, Flint Siltstone captures the visual essence of dark gravel blended with fine mineral particles. This deep, warm gray delivers a bold yet versatile surface, making it a perfect companion to 1097 Citadel for elevated, contemporary environments.
